Common pitfalls preventing smooth moves...

- **Procrastination = stressful move;** start preparing early
- **Not informing your Spouse;** tell them what you've arranged!
- **"My movers were late and I missed something else I had to do"**
 - Plan for anytime between 0800-1700; some work into evening (beyond 2100 hrs with you and 773 LRS permission)
 - Rushing movers to pack your belongings... may not be wise
- **"Will the movers crate my shipment?"**
 - Domestic shipments are not normally crated for moves to/from AK, movers will determine crating to protect your specific items based on characteristic
 - Discuss crating with your TSP during pre-move survey
 - All international & non-temporary storage shipments will be crated
